

Since 20 years DAVID Systems innovates with software for the broadcast industry. Our standard or tailored solutions help media organizations to improve collaboration, produce news faster and distribute content for traditional broadcast and tri-media services. All aspects of a media workflow can be addressed with the DigaSystem® Media Asset Management, supplemented by DAVID's modules from Ingest to Play out.

Leading international public and private Radio and Television stations worldwide trust DAVID Systems' innovation and services capabilities for their operations and their evolution as rich media providers.

We are reinforcing our Customer Solutions Group (CSG) and are looking for a

Solution Consultant (M/F)

reporting to the CSG Management and delivering our project activities.

Your Position and Tasks:

- Effectively support the management of approved projects from receipt of order to implementation of output; provide constant feedback on possible process improvements
- Focus on developing long-term client relationships by delivering superior quality results on time within scope, and on budget
- Act as leader for technical solution delivery, integrating the resources from CSG, R&D and Sales
- Support Sales with pre-sales and consulting activities with the goal to generate deals that are valuable to business and customer satisfaction

Your Profile:

- Diploma/Master Degree in Engineering (Dipl.-Ing.), Business and Engineering (Dipl.-Wirtsch.-Ing./Dipl.-Wirtsch.-Inf.) or equivalent experience
- Rich experience in the media industry, ideally with focus on high-value software, consulting, management or pre-sales technical support
- Problem-solving and solution oriented thinking abilities
- Client oriented attitude paired with distinct customer mindset
- Self-motivated and responsive to internal and customer requirements
- Strong orientation of success, passion to work, good influence skills, good at information gathering and analysis, very good team player
- Willingness to travel is required
- Standard-IT expertise (Network, OS, DB, Storage...)
- DigaSystem and 3rd party related broadcast-integration know-how is a plus

If you are looking for a personal challenge in a growing international environment, you should not hesitate to send your application including salary expectations and potential start date to:
