Being a partner to our customers, our mission is to make their products, programs and content the best! Do you want to take part in the digital transformation of the media industry? Are you interested in promoting professional software and services that enable our radio clients worldwide to be highly successful? To strengthen our **Research & Development Department** at our **Munich headquarters** we are looking for a

Web Developer (f/m/d)

In your role as a web developer you are part of an agile team and drive the evolution of our product portfolio. You support our move from a tool-based to a SaaS strategy and act as partner to our product and project management teams.

Your tasks:

- Develop functional and appealing web- and mobile-based applications and services based on usability
- Ensure quality and continuous delivery by following a test-driven approach
- Stay up-to-date on emerging technologies

Your profile:

- Enthusiasm for usability and responsive design
- Desire for code-quality and architecture
- Practical experience in HTML5, CSS3, JavaScript and with RESTful services and JSON
- Practical experience in frameworks like jQuery and in single page application frameworks like AngularJS or Ember.js
- Analytical, goal-oriented and structured way of working, ability to work in teams, good communication skills
- Self-motivated and responsive to internal and customer requirements

We offer you:

- A strong and trustful relationship with casual customers and partners
- The possibility to learn and grow your capabilities in the booming audio space
- To develop your autonomy and collaboration opportunities in an agile environment
- Flexible working hours and a good work-life-balance
- An international culture and a lot of cool events
- A leading company in the radio industry over 25 years, privately owned with flat hierarchies
- A modern business location in the heart of Munich or Berlin: easy access by public transport or bicycle
