

Listening In Action

Being a partner to our customers, our mission is to make their products, programs and content the best! Do you want to take part in the digital transformation of the media industry? Are you interested in promoting professional software and services that enable our radio clients worldwide to be highly successful? To strengthen our **Research & Development Department** at our **Munich headquarters** we are looking for a

Software Developer C++ (f/m/d)

In your role as a software engineer you are part of an agile team and drive the evolution of our product portfolio. You support our move from a tool-based to a SaaS strategy and act as partner to our product and project management teams.

Your tasks:

- Develop and maintain our real-time, on-air applications and services
- Ensure quality and continuous delivery by following a test-driven approach
- Stay up-to-date on emerging technologies

Your profile:

- Desire for code-quality and architecture
- Practical experience in C++ and Standard Library
- Practical experience with multi-threading and client-server architecture
- Analytical, goal-oriented and structured way of working
- Ability to work in teams and good communication skills
- Self-motivated and responsive to internal and customer requirements

We offer you:

- The possibility to learn and grow your capabilities in the booming audio space
- To develop your autonomy and collaboration opportunities in an agile environment
- A strong and trustful relationship with casual customers and partners
- Flexible working hours and a good work-life-balance
- An international culture and a lot of cool events
- A leading company in the radio industry over 25 years, privately owned with flat hierarchies
